Kshitij Parikh

ABOUT

Aspiring Product Analyst with 3+ years of experience in data-driven product development and experimentation. Leveraging a strong engineering background at Optimoz and Sigma Solve to transform raw user data into actionable insights and scalable product solutions. Expert in using Python, SQL, and A/B testing to track KPIs, analyze user behavior, and optimize onboarding funnels. Proven ability to bridge the gap between technical execution and business strategy to drive measurable user engagement.

SKILLS

Product Analytics

A/B Testing • Funnel Analysis • Cohort Analysis • KPI Design & Tracking • Product Metrics • User Retention • User Acquisition • AARRR Framework • North Star Metrics • Product Strategy • Data Storytelling

Data & Visualization

SQL • MySQL • Python • Pandas • NumPy • Tableau • Mixpanel • Matplotlib

Engineering & Technology

Django • React.js • Next.js • JavaScript • React Native • LangChain • LLMs • GIT • Docker • Redis • AWS S3 • Jira

EXPERIENCE

Optimoz Inc., Gandhinagar (Giftcity) – Software Engineer

MARCH 2024 – APRIL 2026

- Developed FHIR-compliant healthcare applications using Django, React.js, and Next.js.
- Improved onboarding conversion rates by **10%** through funnel analysis, UX optimization, and experimentation.
- Reduced application latency by **11%** by optimizing frontend architecture and API interactions for a large-scale healthcare platform.
- Automated **100%** of manual email workflows, increasing operational efficiency and user engagement.

- Built practitioner, patient, and inventory management workflows supporting data-driven healthcare operations.

Sigma Solve, Ahmedabad— *Python Developer*

JULY 2023 – MARCH 2024

- Built an AI-powered website generation platform using Python, SQL, AWS S3, and LLM technologies.
- Developed scalable backend services using Django and LangChain.
- Automated large-scale Excel data processing workflows using Pandas, significantly reducing manual effort.
- Created interactive analytics dashboards and visualizations to monitor website traffic and product performance.

EDUCATION

Pandit Deendayal Energy University, Gandhinagar – *B.Tech IT*

2017 – 2021 , Gandhinagar

PORTFOLIO

The AARRR Growth Playbook: Deconstructing Tech Titans

(<https://kshitijparikh.github.io/ai-product-analytics/pirate.html>)

Analyzed deep-funnel product metrics across the Pirate Metrics (AARRR) framework, mapping speciality features and psychologies to specific business outcomes (e.g., analyzing Netflix's retention loops and Uber's acquisition models).

Product Teardowns (<https://kshitijparikh.github.io/ai-product-analytics/netflix-teardown.html>)

Netflix, Uber, Spotify, Amazon, Blinkit, Crunchyroll

Universal Recommendation System Playbook

(<https://kshitijparikh.github.io/ai-product-analytics/recommendation.html>)

- Designed the architectural framework and pipeline for a state-of-the-art machine learning recommendation engine.

AI Product Analyzer (https://kshitijparikh.github.io/ai-product-analytics/ai_product_analyzer.html)

Built an automated dashboard and interactive NLP for product health.

EXTRA-CURRICULARS

Student Exchange Program – Sacred Heart University, Connecticut, USA

- Selected for an international exchange program focused on innovation, technology, and business operations.
- Studied large-scale operations through visits to Amazon Logistics, IBM, and the New York Stock Exchange.
- Developed a dynamic LED MoodLight integrated with real-time weather data.

Community Impact Volunteer – Rotary Club

- Organized a free community health awareness and screening campaign.
- Coordinated outreach efforts that successfully mobilized **500+ participants.**

Taekwondo

- Developed discipline, resilience, teamwork, and the ability to perform under pressure through competitions in the university.
